EDUCATION

Master of Management Sciences | GPA: 3.7/4.0 | **University of Waterloo** | *Waterloo, Canada* Sep 2022 - Dec 2023
Achievements: Graduate Teaching Assistant for Quality Management and Control (100+ students) Sep '23 - Dec '23
Bachelor of Engineering in Production Engineering | GPA: 8.5/10 | **University of Mumbai** | *Mumbai, India* Aug 2017 - Aug 2021
Achievements: Mumbai University Final Year Gold Medalist for B.E. Production Engineering 2021
Publications: 1 journal (Unconventional Machining of Ceramic Matrix Composites) & 1 conference (Materials Today Proceedings Elsevier 2022)

SUMMARY

IT Business System Analyst with 3+ years of experience in agile environments, enterprise systems integration, data analytics and AI-driven automation across cloud-based platforms, specializing in translating business and technical requirements into defined acceptance criteria, driving system implementations, and leading UAT and process optimization initiatives.

SKILLS

Systems, Integration & Architecture: Custom Built Enterprise Applications (Design, Implementation & System Integration) | Apache Kafka | Confluent | Hasura | GraphQL APIs | Data Flow Diagrams | API Integrations | Microservices Architecture | ETL Processes | Data Pipelines
Cloud, Databases & Platforms: Azure DevOps | GCP | AWS | Snowflake | PostgreSQL | MySQL | SQL Server | MongoDB | Google Firebase | Workday ERP | Workday Financial Management | Workday Interface Builder | SAP BI/BW | Data Warehousing
Data, Analytics & Reporting: SQL | Data & Business Analytics | Advanced Excel | VBA | Power BI | Tableau | Demand Forecasting | Data Validation & Data Reconciliation
Automation & AI: AI Workflow Automation | LLMs & Intelligent Agents | n8n | Webhooks | Skyvern | Power Automate | Claude
Testing & Quality Assurance: User Acceptance Testing | Functional & Regression Testing | Web Services Testing | Postman | Swagger
Business Analysis: Requirements Engineering | Epics, Features & User Story Development | Agile & Scrum Methodologies | Jira | SDLC | Stakeholder Management | Project & Change Management | Process Improvement & Optimization | Process Automation & Orchestration

EXPERIENCE

Charger Logistics Inc. | **Business System Analyst** | *Brampton, CA* Apr 2024 - Present

- Developing an AI-enabled workflow automation capability using **n8n, Webhooks and Python**, thereby leveraging **LLM-based agents** and structured data pipelines to streamline stakeholder interaction with internal enterprise applications, enabling conversational task execution and reducing manual operational dependencies across business processes.
- Spearheaded the end-to-end product ideation and solution design for a mobile application by eliciting and translating business requirements into **epics, features, and user stories** with clear acceptance criteria to digitize complex compliance and process workflows for 200+ users.
- Led the development of an inventory management and service orchestrator system, architected user workflows, conducted requirement analysis and thorough testing and debugging within a compressed release cycle in an **agile scrum environment**, and managed 4 production releases with 95% **UAT**, ensuring high-quality product deliverables leveraging **MongoDB, Azure DevOps, SQL and Swagger**.
- Contributed to the development and QA of enterprise web and mobile applications, including a financial auditing platform, conducted stakeholder validations, exploratory and regression testing, orchestrated large-scale data integrations and migrations, and led **UAT** cycles that enhanced system functionality by 85%, using **Snowflake and Excel** for data reconciliation, audit reporting, and process gap identification.
- Executed the implementation of the Workday Procurement Module, translated business requirements into functional workflows, optimized 150+ data attributes, defined 10+ KPIs, and drove a 40% efficiency gain through workflow automation and post-production enhancements that improved governance and process control by 85%.
- Orchestrated large-scale data integrations across multiple applications, supported stakeholders by optimizing bulk ETL templates, resolved data discrepancies through system-level identifiers, and delivered automated reporting solutions using **Power BI** to enhance data accuracy.

ESGTree | **Business System Analyst Intern** | *Waterloo, CA* Mar 2024 - Apr 2024

- Conducted an ESG data evaluation project using **JIRA** by coordinating with cross-functional stakeholders and managed provider assessments (MSCI, Sustainalytics, Refinitiv, CDP).
- Leveraged **Excel and Tableau** to integrate financial data modeling and visualization for simplifying complex market offerings to deliver strategic recommendations enabling stakeholders to drive informed enterprise ESG initiatives.

Kansai Nerolac Paints Ltd. | **Corporate Planning Analyst** | *Mumbai, IN* Aug 2021 - Oct 2021

- Gathered and analyzed business and operational requirements by collaborating with cross-functional stakeholders, conducting data analysis using **Excel** to identify process inefficiencies and optimize production workflows in **SAP BI/BW**.
- Developed **Power BI** dashboards and performed gap analysis to track KPIs, evaluate performance, and delivered data-driven recommendations that improved operational efficiency and supported strategic decision-making.

Dow Chemical International Pvt. Ltd. | **Research Intern** | *Mumbai, IN* Dec 2020 - Apr 2021

- Built a high fidelity prototype for conducting polyol flow studies, collaborating with the R&D team, leveraging **CFD and Neural Networks**, diagnosed bottlenecks and re-engineered workflows by automating 13 manual operational interventions, resulting in cost optimization, margin enhancement, and improved process efficiency.
